

### SR Technologies

### Automation Systems

### Propen

Programmable Part Marking Machines, Low Cost and Simple to Use, Dot-Peen or Laser Marking Machines

### Edge Technologies

Productivity Solutions for Bar Feeding & Parts Feeding

### LNS/Turbo

Barfeeds, Chip Conveyors, Steady Rests, Mist Collectors

### Kalamazoo Machine Tool

Horizontal & Vertical Band Saws, Manual, Semi-Automatic, Fully Automated Models, High Production Sawing Machine with CNC Capabilities

### Part Maker

Offline Programming Systems, Milling & Turning Programming Software

### CoolJet Systems

High Pressure Coolant Systems, Chillers, Filtrations and Mist Collectors

### FireTrace

Automatic Fire Detection and Suppression, Security for Unmanned Operation, No Electrical or Plumbing Requirements

### ATS Systems

4th & 5th Axis Rotary Tables, Sizes from 5C Collet to 24" Faceplate, Operate by Full 4th Axis, RS232 or M-Code. Interface and Training by Our Local Engineer

### Astral Precision

Specializing in Metrology Equipment: OMM's, Vision Measuring Systems, Optical Comparators, Electronic Height Gauges, Form Measuring Systems, Bore Gauges

### Atlas Copco

Rotary Screw and Piston Style Air Compressors and Air Management Systems

### Other Accessories

Midaco Pallet Changers, Wells Saws, Single & Magazine Bar Feed Systems, Kitagawa Chucks, Chick Workholding, and Many More

# Why **520** Pre-Owned Equipment Center?

**520** Pre-Owned Equipment Center has grown from 40 machine sales per year to 300, and has become one of the largest volume used equipment distributors in the Midwest. This has happened in 3 short years. Why?

We understand that our customers are more educated in regards to market values of their machine tools than they have ever been. We work with the customer to agree on a selling price that is at market value. **We work on volume.**

**Our 5 man pre-owned staff** (in addition to the 5 new equipment salesmen) **have a combined 165 years experience in selling CNC equipment.** Our knowledge of the industry is excellent and we have contacts throughout the world.

**We have integrity.** Working with a used equipment dealer can be extremely complicated. Other used dealers will issue purchase orders with no intention of actually buying the equipment. We don't play games. If we are buying your machine....we are buying your machine.

**We not only offer a start up guarantee on our stock inventory, but also stand behind equipment that we assist our client in selling.** It's like finding a good mechanic, once you find one you trust there is no reason to go to anyone else. The majority of our clients are repeat buyers and sellers.

**Our customer's come back.** There seems to be a philosophy in used equipment where the dealer tries to squeeze every penny possible out of each deal. We prefer to give the seller and buyer a fair deal so that both come back to us for future deals. It is clear that our philosophy is different from other used dealers because of the feedback that we get from our customer's....not to mention they come back to work with us again and again.
